and will last for approximately 9 months*

Free consultations available to discuss your requirements. Treatment appointments are 30-60 minutes

Introducing Botox & Fillers with Dr Jeanine Smirl

Botox: Helps reduce lines and wrinkles. Rejuvenates and contributes to a youthful appearance. This treatment can slow down the normal formation of wrinkles and shallow depressions. It is also used in the correction of very thin, superficial facial lines, especially those around the eyes and mouth. Botox can also be used in the reduction of excessive sweating.

Filler: This is best suited for those areas that have deeper lines and wrinkles. This anti ageing treatment includes an anaesthetic resulting in a more comfortable wrinkle injection, offering immediate, natural results that can last up to 12 months.

Botox & Filler treatments are suitable for most adults over the age of 18. Filler can also be used after 2 weeks of having Botox.

Aesthetic Treatments Offered By Dr. Smirl

Botox is not something new, it has been used safely for many years to treat muscle conditions and squints in people of all ages. Since the early 90's, it has been used to reduce facial wrinkles especially frowns and crows feet with great success. Botox used correctly can prevent frown lines and crows feet from developing, the lines you see when you frown or grin will become deeper and visible at rest over the next 5 – 10 years. Established lines can be softened to give a more refreshed and rested look. I start with small amounts and adjust doses carefully, clients have told me friends say they look great without noticing that they have had treatment, that is my aim!

I am also offering hyaluronic acid temporary fillers (Juvaderm Ultra) to treat established wrinkles and to treat lines around and under the lips. Again, I like using small amounts to correct problem areas and not to plump lips and cheekbones. The results are immediately noticeable but subtle.

I am linked to a group of GP's and Dentist's providing aesthetics and we undertake further training to enhance our skills as well as exchange ideas on a regular basis. Some of my testimonials are enclosed.

Small injections are given into the muscle.

Treatment takes about 20 minutes and lasts 3-4 Months.

The best time to start is in your mid 30's. In order to prevent deep wrinkles.

Juvaderm fillers are used for deeper forehead wrinkles and for areas around the mouth.

Botox can be used to treat excessive sweating, this is extremely effective and usually lasts 7-9 Months. If you get embarrassing sweat rings in your armpits which can't be controlled by strong deodorants, then Botox may be your answer

A Few Client Testimonials Following Treatment

“Jeanine, thank you so much for filling my face cracks. It was put to the test last night, I went round to B&L’s for dinner and they both couldn’t get over how good I looked, I didn’t let my secret out, I just enjoyed the compliments. I love you and your syringe full of elixir!” L. after Juverderm filler

“Big success, hope you will be coming back! People just say spontaneously I am looking very fresh and rested...”

“It’s fantastic, no frown and looks like I’ve had eyebrow lift... I also love how you lifted S’s lip (Botox), will you do that for me please? Thanks you are brilliant!”

“She looks fantastic! Ten years younger... (Comment about C who has had Botox and Fillers – Feb 2011

I just wanted to say I’m very happy with the Botox you did for me and looks great around the eyes! I’ll be in touch for the next course! S. – March 2011

“I was so impressed with C and L’s Botox. Stunning results... they both look so much better”. “I have just seen S for the 1st time since her Botox, she looks really good...” comment from their friend who later became a client herself

Dermaroller Treatment – Natural Skin Regeneration And Scar Repair.

NEW:

This treatment can significantly repair the appearance of:

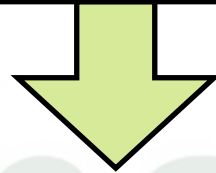

- Acne scars
- Aged and sun damaged skin
- Superficial wrinkles
- Stretch marks

Using local anaesthetic to numb the area, this skin needling technique stimulates the skin to regenerate and repair itself. New collagen is formed, new skin cells are regenerated and the blood supply is enhanced.

The cost is £250, the procedure takes approximately 1 hour and usually 3 treatments are recommended 6 – 8 weeks apart.
